

How to detect System Center Endpoint Protection (SCEP) as installed application in Application Portal of Parallels Mac Management for Microsoft SCCM

• Parallels Device Management

Symptoms

How to detect System Center Endpoint Protection (SCEP) as installed application in Application Portal of Parallels Mac Management for Microsoft SCCM?

Resolution

- 1. Click on application with SCEP in **Software Library -> Overview -> Application Management -> Applications**.
- 2. Open **Deployment Types** tab in the bottom pane.
- 3. Right click on SCEP deployment type and click **Properties** in opened context menu.
- 4. Open Deployment Method tab in {scep-app-name} Mac OS X Properties dialog.
- 5. Select row with Package ID:

com.microsoft.systemCenter2012EndpointProtection.scep.pkg

value in Clause column.

- 6. Click **Delete Clause** button.
- 7. Click **OK** in {scep-app-name} Mac **OS** X Properties dialog.
