

<u>Unable to install RAS components: You must run this setup</u> with Admin Rights:

- Parallels Remote Application Server 18.0
- Parallels Remote Application Server 19.1
- Parallels Remote Application Server 18.3
- Parallels Remote Application Server 18.2
- Parallels Remote Application Server 19.0
- Parallels Remote Application Server 18.1

Symptoms

• Unable to install RAS components: You must run this setup with Admin Rights:

Resolution

- 1. Run Command Prompt as administrator.
- 2. Navigate to the directory where the installer is located, e.g.:

cd %userprofile%\Desktop

3. Run the installer executing .msi file name for example:

msiexec /i RASinstaller.msi
