

Change the SSRS Default Port

- Parallels Remote Application Server

Change the SQL Reporting Services default port to 8085 according to the procedure below, based on best practices:

1. Open the ?Reporting Services Configuration Manager? . Go to ?Web Service URL? and change the ?TCP Port? to **8085**. Click Apply.
2. Next, go to ?Report Manager URL? and click ?Advanced?.
3. From the ?Multiple Identities for Report Manager? section, click ?Edit? to bring up the ?Edit Report Manager HTTP URL? window.
4. From this window change the ?TCP Port? to ?8085? and click OK. Also click ?OK? on the ?Advanced Multiple Web Site Configuration? window to apply the settings.

Congratulations! You have successfully changed the MS SQL Reporting Services Default Port. For further information regarding the 2X Reporting installation and setup procedure, go here:
