

Unable to install WSUS certificate

- Parallels Device Management

Symptoms

During the installation certificate to **WSUS** you are getting the following error:

```
[Reflection.Assembly]::LoadWithPartialName("Microsoft.UpdateServices.Administration")
$updateServer = [Microsoft.UpdateServices.Administration.AdminProxy]::GetUpdateServer()
$config = $updateServer.GetConfiguration()
PS C:\Windows\system32> $updateServer.GetConfiguration()
Exception calling "GetConfiguration" with "0" argument(s): "Index was outside the bounds of the array."
At line:1 char:1
+ $updateServer.GetConfiguration()
+ ~~~~~
+ CategoryInfo          : NotSpecified: (:) [], MethodInvocationException
+ FullyQualifiedErrorId : IndexOutOfRangeException
```

Cause

Installation of **KB3159706** breaks **WSUS** instance for **SCCM**

Resolution

Open an elevated **Command Prompt** window, and then run

C:\Program Files\Update Services\Tools\wsusutil.exe postinstall /servicing.

Select **HTTP Activation** under **.NET Framework 4.5 Features** in the **Server Manager Add Roles and Features wizard**.

Restart the **WSUS** service.

Reboot Server.
