

## **Parallels Desktop for Mac mass deployment**

- Parallels Desktop for Mac Business Edition

If you want to know how to mass deploy Parallels Desktop for Mac Business Edition to your company Mac computers, you can find the required data below.

---

**Note:** for deploying Parallels Desktop on macOS Ventura, use Parallels Desktop 18.1.1 or a newer build.

---

1. Download the [Parallels Desktop Mass Deployment package](#) archive.
2. Follow [KB 129460](#) to prepare the package for deployment.
3. Check the latest [Parallels Desktop Business Edition Administrator's Guide](#), where you will find all the necessary instructions.

**Note:** do not forget to replace XXXXXX-XXXXXX-XXXXXX-XXXXXX-XXXXXX with valid Business edition license key in deploy.cfg file.
