

Parallels Mac Management activation

- Parallels Device Management
- Parallels Mac Management 5.0

Information

After you registered your subscription in Parallels My Account, you can activate Parallels Mac Management using your license key.

To activate Parallels Mac Management, follow the steps below:

1. Open the **Configuration Manager** console.
2. Navigate to **Administration / Overview / Parallels Mac Management / Licenses**.
3. Right-click your site in the Licenses list and choose **Activate license**. The Parallels Mac Management - Activate License dialog opens.
4. Input your license key and select the **Activate online** option.
5. Click **Next**.
6. Parallels Mac Management connects to the Parallels Licensing Server and verifies the key.
7. If the key is valid, the license information is displayed on the screen. Review the information and click **Activate**.
8. On successful activation, the display value of the License status column in the Licenses list in the SCCM console changes to **Activated**.
9. Your Parallels Mac Management installation is activated and the activation information is added to your [Parallels account](#).
